

Services & Pricing Restructure

Brief for Claude Code · Character Art Agency

Goal

Expand and reorganize the services offering. The site currently lists five flat services (Character Art, VTT Tokens, Party Portraits, NPC Packs, Custom Projects). Replace this with a tiered, bundled structure organized into clear buckets, with genre handled as a filter/attribute rather than as separate services.

All art is **hand-drawn / fully manual digital**. Buyers are a mix of individual players, Game Masters, and publishers. Turnaround is variable and quoted as ranges, not fixed.

Key structural decisions (please respect these)

- **Genre is a filter, not a service.** Fantasy, sci-fi, horror, cyberpunk, modern, historical, etc. should be a portfolio filter and an order-time selection — NOT separate service pages. The same service covers all genres at the same price.
- **Keep the visible service menu to ~5–7 buckets.** Do not create a separate page per genre or per tier.
- **Tiers reflect rendering complexity, not subject matter.** Most services have Basic / Standard / Premium tiers.
- **Bundles are first-class offerings**, not afterthoughts (especially Character + Token).
- **Pricing is in USD.** Complex services are quoted as "from \$X" ranges; the final quote follows the brief.
- Three buyer types ideally get distinct entry points: players → "commission your character," GMs → "packs, maps & subscription," publishers → "commercial / licensing."

Service catalog & pricing

Bucket 1 — Character work

Service	Pricing (USD)
Character Portrait (bust)	\$60 / \$90 / \$140
Full-body Character Art	\$120 / \$180 / \$280
Character Reference Sheet (3–4 views)	\$250–\$450
Character + Token Bundle	portrait tier + \$25

Tier key (Basic / Standard / Premium): Basic = clean line art, flat color, simple shading, plain background. Standard = full rendering, light/shadow, textured materials, suggested setting. Premium = high detail, dynamic pose, effects, full atmospheric/environmental background. Reference sheet upper end adds extra angles, expressions, detail call-outs, alt outfit. Bundle adds a circular VTT-ready token from the same art.

Bucket 2 — Party work

Service	Pricing (USD)
Party Portrait (up to 4 in one composition)	\$350 / \$600 · +\$80–120 per extra member
Matched Party Set (separate portraits, unified style)	\$220 (4) / \$320 (6)
Action / Scene Illustration	\$400–\$900

Party Portrait shown as Standard / Premium. Action scene = party mid-encounter with background and lighting.

Bucket 3 — GM / world-building

Service	Pricing (USD)
NPC Pack (portraits, simpler render)	\$220 (5) / \$400 (10)
Monster / Creature Art	\$90–\$250 by complexity
Item / Artifact Illustrations	\$30 each, or 6 for \$150
Battle Map (hand-drawn, gridded, VTT-ready)	\$150–\$400 by size/detail
World / Region Map (decorative, stylized)	\$300–\$700

Bucket 4 — Tokens (standalone)

Service	Pricing (USD)
Single Custom Token (original art)	\$40–\$60
Token Pack (5 originals)	\$180
Convert client's existing art to token	\$15

Bucket 5 — Commercial / publisher

Service	Pricing (USD)
Licensing uplift (published / for-sale / streamed use)	+75–100% on base price
Publisher / Kickstarter retainer	custom quote

*Usage scope negotiated per project. This should be a "work with us / get a quote" contact flow, not a fixed add-to-cart price.
Retainer = day-rate or per-asset with volume discount.*

Optional — Recurring (include only if it fits the site)

Service	Pricing (USD)
---------	---------------

Campaign Companion subscription

~\$30/mo (10 tokens + 2 NPCs)

Campaign Companion — GM tier

~\$75/mo (tokens + NPCs + 1 map)

Treat this bucket as genuinely optional — only worth including if monthly delivery can be guaranteed. Drop it otherwise.

Policies to surface near pricing / checkout

- **Revisions:** each tier includes a set number of revision rounds (suggest 2); extra rounds billed per round. Display this with the price.
- **Deposit:** 30–50% upfront, non-refundable after sketch approval.
- **Turnaround:** shown as a range per tier (e.g. "2–4 weeks"), framed as handcrafted / limited slots — not instant.
- **Genre selection:** offered at order time as a dropdown / checkbox.

Implementation notes for Claude Code

- Fit this into the site's existing patterns — reuse existing service / pricing components and data structures rather than inventing new ones where possible.
- If services are currently stored as a data array / CMS collection, model tiers, add-ons (token bundle, extra party member), and the genre attribute in that same structure.
- Preserve the ability to revert; propose the change before large rewrites.
- Flag anything in this brief that conflicts with the current architecture rather than forcing it.

On the numbers: these prices are starting points calibrated for a competent professional hand-drawn illustrator. If the portfolio is strong or demand is high, the upper ends are all justified, and prices can be nudged up later without restructuring anything.

Cross-cutting summary: genre = filter & order-time choice (not a separate service) · tiers = rendering complexity · 2 revision rounds included · 30–50% deposit · turnaround quoted as a range.
